

A Extraction and quality-control workflow

B Automated OC rejections

❌ Band count too low

IR (KBr): 3421, 2923, 2854 cm^{-1} — <3 unique peaks after de-duplication.

❌ IR band outside window

IR (neat): 3200, 2958, 4180, 1520 cm^{-1} — 4180 outside 350–4000 cm^{-1} .

❌ ^1H integral vs formula

^1H : (5H)+(5H)+(10H)=20H; $\text{C}_6\text{H}_5\text{NO}_2$ (7H) — integral > H+2.
